

“Just the Facts” — ARRL Field Day 2008

With a tip of the hat to Jack Webb, we investigate this annual phenomenon that looks suspiciously like a whole lot of fun.

Dan Henderson, N1ND

Field Day “Detective”

When the sunny days of June come, some people will spend countless hours throwing baited hooks into waterways hoping to snare the largest fish ever. Others will swing wildly at small, dimpled balls on green pastures known as courses trying to make pars and avoid bogeys. You will find others who will walk with a purpose, mow grass or find many other ways to amuse and entertain themselves.

But for some when the fourth full weekend of June arrives, they will eschew all other forms of recreation and entertainment to spend their time frantically throwing ropes through trees, pulling up wires and spending hours speaking into electrical devices. Perhaps some are pounding pieces of brass to make electrical impulses promulgate through the atmosphere or typing into a computer making messages that will then transmit through the ether. Tens of thousands of these perpetrators gather to partake in this annual ritual... And when that happens, I become involved... My name is Hiram... I carry a call sign.

The story you are about to read is true... No call signs have been changed because none of the participants are innocent...

It was Friday evening June 27. I was working the weekend watch out of the Maxim Memorial Station on Main Street in Newington when we received the first notice that something might be up. It seemed that W1AW was sending out a transmission known as a “Field Day bulletin.” I had heard this before and for some reason this activity always signaled the start of the rampant raucous radio reverberations associated with this “Field Day” activity. After consulting with our chief, “The Old Man” himself, my partner Percy and I decided we had better pay close attention over the next hours, as we were never sure what to expect when this episode began.

Things remained quiet for the next few hours, but based on past years we knew that it was during this quiet time after the first bulletins that the “perps” were finalizing their plans for the assault that began for most groups on Saturday morning. And it was shaping up to be huge — in fact, we ended up with reports of a record number of perps, uh, participants — more than 35,000 were apparently involved. This was going to take a lot more work than usual to handle.

We had gotten the word from our snitch, Joey C (who was known to hang around W1AW), that at precisely 1800 UTC on Saturday June 28 the frenetic firing of electrons would begin. And so they did... Over the rest of this “Field Day” over 1.2 million contacts, known as QSOs, were completed. This was an amazing number of contacts, considering that some clown known as Ol’ Sol had apparently stolen all of a rare resource known as “sunspots,” which made QSOs hard to come by on many bands. My partner Percy commented he hadn’t seen such a caper since Claude Cooper, the kleptomaniac from Cleveland, copped the clean copper clappers from the Acme School Bell Company — the famous Sgt Joe Friday case from *Dragnet*. A curious clue came from this data — the

number of digital QSOs continued their climb, representing over 2% of the total contacts completed for the first time ever. They were coming in faster than a Chicago typewriter.

“The Old Man” had reminded Percy and me that we needed “only the facts,” but gathering them was turning into a titanic task. As we started deciphering the exchanged messages for clues, we realized that they seemed to be coming from all over. It turned out that participants from every US state, territory and ARRL section except the Virgin Islands, and all Canadian provinces and territories acknowledged their activities by submitting an entry report. Most were received via the www.b4h.net/cabforms Web site, which garnered them an immediate acknowledgment of their activities as well as bonus points. Ohio and Michigan led the way with reported activities — this was truly a continent-wide escapade.

Joey C (our snitch) reminded us that it might be hard to track down all of the perpetrators because in the past the majority of them “went on the lam” and operated from places other than their normal comforts of their homes. Again, Joey C was right — as it turned out, 1694 of the entries claimed to

be operating as either class A, B or F, which would put them out in the field. Hmm...In the field for Field Day...This could be a significant clue. As it turned out, there was a Web site where perps could post details

about their operating locations, making it easier to draw accomplices into the action. Joey C reminded us that this Web site (www.arrl.org/contests/announcements/fd/locator.php) was a new feature — and

used by over 1500 participants. This thing had spread like wildfire.

At 2100 UTC on Sunday, June 28, the activities on the air stopped as suddenly as they had begun. As we combed the rules for clues we discovered that this was a once a year event and most stations were limited to 24 hours of operating time. So all Percy and I could do at HQ was to accumulate the several thousand incoming reports and see what sense we could make of this activity.

Things quickly came into focus as we worked on our report for the record. Apparently this “Field Day” thing was intended to test Amateur Radio operators and their ability to get on the air in less than ideal circumstances. It has been taking place for over 70 years and there doesn't appear to be an end in sight. Over 170 of these groups openly shared details of their activities with others on the ARRL Contest Soapbox, which we found online at www.arrl.org/contests/soapbox/. Seems people are prone to “brag” about their activities during Field Day — something that can be understood after you read their comments and see the pictures in the Soapbox.

So the best Percy and I can do is surmise that this Field Day takes place every year on the fourth full weekend in June — that means that we will be busy June 27-28, 2009. And based on the results and reports we received, I think we can advise that this is the most popular 24 hour Amateur Radio activity in the world. Our best bet...join in the fun — after all, if you can't beat them, join them!

Scores

Class A stations are clubs or groups operating with more than two operators. Score listings are grouped according to the number of transmitters in simultaneous operation. The listings show club or group name, call sign(s) used, total number of QSOs, number indicating power output used (5 is less than 5 W, 2 is less than 150 W; 1 is more than 150 W), number of participants and total score including bonus points and ARRL section. Scores are listed from highest to lowest in each class. Class B stations are portables manned by one or two operators. When there are two operators, the other operator's call is listed in parentheses, if it is known. Class C stations are mobiles. Class D stations are home stations using commercial power. Class E stations are home stations using emergency power. Class F stations are EOC stations.

Eight Boy Scouts from Troops 69, 2000 and 3000 joined North Fulton Amateur Radio League for Field Day and went for their Radio Merit badge at the site. After helping put up antennas during setup, the scouts got down to business to pass their merit badge requirements under the direction of Wes, W3WL, at the rig. Here, the scouts are getting ready to make their first FD contacts under the eye of US Senator Johnny Isakson (red shirt).

VHF/UHF Century Club Awards

Compiled by Sharon Taratula
Administrative Manager

The ARRL VUCC numbered certificate is earned by amateurs who submit written confirmation for contacts with the minimum number of Maidenhead grid locators (indicated in italics) for each band listing. The numbers preceding call signs indicate total grid locators claimed. The numbers following the call signs indicate claimed endorsement levels. The totals shown are for credits given from July 18, 2008 to September 15, 2008.

The VUCC application form, field sheets and complete list of VHF Awards Managers can be found on the VUCC Web site at www.arrrl.org/awards/vucc. An SASE to ARRL is required if you cannot download these forms. Send questions relating to VUCC to vucc@arrrl.org.
